Rabbit Genetics is a peer-reviewed journal. Each published article was independently seen before by two scientific reviewers and at least one linguist. Peer-review policy: we use double blind peer-review.

The journal covers all the sub-fields and related fields of rabbit genetics (structure, function, evolution, ecology, taxonomy) and genetic issues of rabbit husbandry (including technology and biotechnology). Exceptionally, the journal will accept also papers of rabbit physiology, mainly on biochemistry and metabolism.

Rabbit Genetics is a good opportunity for you to publish your original research, review, opinion, or short communication, both printed and online, color, open access. The journal will be disseminated on a very large scale.
